"EXERCISE TO STIMULOATE, NOT TO ANNIHILATE"

Tips to exercise safely:-

Exercising regularly has wide-ranging physical emotional and social health benefits. You need to exercise safely to remain health and injury-free. If it's safe and painless, you're more likely to stick to it! Safety is about using common sense, understanding basic techniques and listening to your body.

Here are some tips to stay safe and injury-free:

- **Be aware of your body.** Think about how the particular exercise is making you feel. If something doesn't feel right, stop immediately and seek medical advice.
- **Warm up and cool down.** Try slow stretches and go through the motions of your sport or activity before starting, cool down with slow stretching.
- **Pace yourself.** Have at least one recovery day experiencing, rest until the pain has gone.
- **Mix it up.** Try other sports and exercises to reduce the risk of overtraining.
- **Strap or tape.** If a joint is prone to injury, consider strapping or taping it before exercising. Even better, see an exercising physiologist or physiotherapist to obtain a program to strengthen the injured area and get advice on proper taping techniques.
- **Stay hydrated.** You can lose around one and a half litres of fluid for every hour of exercise: so, drink water before, during and after a session.
- **Be weather aware.** Take it easier in hot weather and wear clothing and sunscreen to protect yourself from the elements.
- **Do it Right.** Try to get the technique right from the beginning to ensure you are using your muscles correctly.
- **Check your gear:** Make sure your shoes and equipment fit properly and are right for the activity. Look after your equipment and check it regularly for safety.
